

# Animal Groups

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Grade: Grade 1

## Part A: Multiple Choice

Circle the letter of the best answer.

1. A whale lives in the ocean. Why is a whale a mammal and not a fish?

- A) It is very big
- B) It breathes air and feeds its baby milk
- C) It swims in the water
- D) It has a tail

2. Which feature do ALL birds share?

- A) They can all fly
- B) They all live in trees
- C) They all have feathers
- D) They all eat seeds

3. What does it mean when an animal is cold-blooded?

- A) It lives in a cold place
- B) Its body temperature changes with the environment
- C) It does not have blood
- D) It is always freezing

4. An animal has a backbone inside its body.

What is this animal called?

- A) An invertebrate
- B) An insect
- C) A vertebrate
- D) A plant

## Part B: Fill in the Blank

Write the missing word on the line.

1. Animals with a backbone are called \_\_\_\_\_.
2. Insects do not have a backbone, so they are \_\_\_\_\_.
3. Mammals and birds are \_\_\_\_\_-blooded animals.
4. Reptiles and fish are \_\_\_\_\_-blooded animals.
5. A penguin cannot fly, but it is still a \_\_\_\_\_ because it has feathers.

**Part A: Multiple Choice**

Circle the letter of the best answer.

1. A whale lives in the ocean. Why is a whale a mammal and not a fish?

- A) It is very big
- B) It breathes air and feeds its baby milk
- C) It swims in the water
- D) It has a tail

2. Which feature do ALL birds share?

- A) They can all fly
- B) They all live in trees
- C) They all have feathers
- D) They all eat seeds

3. What does it mean when an animal is cold-blooded?

- A) It lives in a cold place
- B) Its body temperature changes with the environment
- C) It does not have blood
- D) It is always freezing

4. An animal has a backbone inside its body. What is this animal called?

- A) An invertebrate
- B) An insect
- C) A vertebrate
- D) A plant

**Part B: Fill in the Blank**

Write the missing word on the line.
