

# The Water Cycle

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Grade: Grade 1

## Part A: Multiple Choice

Circle the correct answer for each question.

1. Why does water evaporate from puddles on a sunny day?

- A) The wind blows it away
- B) The sun heats the water and turns it into vapor
- C) The ground soaks it all up
- D) It freezes and disappears

2. What causes clouds to form in the sky?

- A) Smoke rises from the ground
- B) Water vapor cools and turns into tiny water drops
- C) Wind pushes fog up high
- D) Rain floats back up into the sky

3. What happens to water vapor as it rises higher in the sky?

- A) It gets hotter
- B) It turns into ice cream
- C) It cools down
- D) It stays the same temperature

4. Which is the correct order of the water cycle?

- A) Precipitation, evaporation, collection, condensation
- B) Evaporation, condensation, precipitation, collection
- C) Collection, precipitation, condensation, evaporation
- D) Condensation, collection, evaporation, precipitation

## Part B: Fill in the Blank

Write the missing word on the line.

1. The \_\_\_\_\_ provides the energy that drives the water cycle.
2. During evaporation, liquid water changes into an invisible gas called water \_\_\_\_\_.
3. Condensation is the opposite of \_\_\_\_\_.
4. Clouds are made of millions of tiny water \_\_\_\_\_ or ice crystals.
5. Without the sun, the water cycle would \_\_\_\_\_.

## Answer Key · The Water Cycle · Grade: Grade 1

---

### Part A: Multiple Choice

Circle the correct answer for each question.

1. Why does water evaporate from puddles on a sunny day?

- A) The wind blows it away
- B) The sun heats the water and turns it into vapor**
- C) The ground soaks it all up
- D) It freezes and disappears

2. What causes clouds to form in the sky?

- A) Smoke rises from the ground
- B) Water vapor cools and turns into tiny water drops**
- C) Wind pushes fog up high
- D) Rain floats back up into the sky

3. What happens to water vapor as it rises higher in the sky?

- A) It gets hotter
- B) It turns into ice cream
- C) It cools down**
- D) It stays the same temperature

4. Which is the correct order of the water cycle?

- A) Precipitation, evaporation, collection, condensation
- B) Evaporation, condensation, precipitation, collection**
- C) Collection, precipitation, condensation, evaporation
- D) Condensation, collection, evaporation, precipitation

### Part B: Fill in the Blank

Write the missing word on the line.

1. The sun provides the energy that drives the water cycle.
2. During evaporation, liquid water changes into an invisible gas called water vapor.
3. Condensation is the opposite of evaporation.
4. Clouds are made of millions of tiny water drops or ice crystals.
5. Without the sun, the water cycle would stop.
