

Attributes of Shapes

Name: _____

Date: _____

Grade: Grade 3

Part A: Fix the Sentence

Each sentence has an error. Rewrite it correctly on the line.

1. Fix the sentence: A rhombus always has 4 right angles.

Rewrite: _____

2. Fix the sentence: A decagon has 8 sides and 8 angles.

Rewrite: _____

3. Fix the sentence: An open figure with straight sides is a polygon.

Rewrite: _____

Part B: Fill in the Blank

Write the missing word or number on each line.

1. A polygon with 10 sides is called a _____.
2. A square is a special _____ because all 4 sides are equal.
3. Lines that run side by side and never meet are called _____ lines.
4. A quadrilateral always has _____ angles.

Part C: True or False?

Read each statement. Circle True or False.

1. Every rhombus is a parallelogram. True False
2. A hexagon has 5 vertices. True False
3. All polygons have straight sides. True False

Part A: Fix the Sentence

Each sentence has an error. Rewrite it correctly on the line.

1. Fix the sentence: A rhombus always has 4 right angles.

Rewrite: A rhombus has 4 equal sides but does not always have right angles.

2. Fix the sentence: A decagon has 8 sides and 8 angles.

Rewrite: A decagon has 10 sides and 10 angles.

3. Fix the sentence: An open figure with straight sides is a polygon.

Rewrite: A closed figure with straight sides is a polygon.

Part B: Fill in the Blank

Write the missing word or number on each line.

1. A polygon with 10 sides is called a decagon.
2. A square is a special rhombus because all 4 sides are equal.
3. Lines that run side by side and never meet are called parallel lines.
4. A quadrilateral always has 4 angles.

Part C: True or False?

Read each statement. Circle True or False.

1. Every rhombus is a parallelogram. True False
2. A hexagon has 5 vertices. True False
3. All polygons have straight sides. True False
