

# Understanding Fractions

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Grade: Grade 3

## Part A: Fix the Sentence

Each sentence has an error. Rewrite it correctly on the line.

1. Fix the sentence: *In the fraction  $\frac{2}{5}$ , the number 2 is the denominator.*

Rewrite: \_\_\_\_\_

2. Fix the sentence:  *$\frac{1}{4}$  is greater than  $\frac{1}{3}$  because 4 is bigger than 3.*

Rewrite: \_\_\_\_\_

3. Fix the sentence: *When a shape is split into 5 equal parts with 5 shaded, half is shaded.*

Rewrite: \_\_\_\_\_

## Part B: Fill in the Blank

Write the missing word or number on each line.

- In the fraction  $\frac{6}{10}$ , the denominator is \_\_\_\_\_.
- A rectangle divided into 3 equal parts with 2 shaded shows the fraction \_\_\_\_\_.
- The top number of a fraction is called the \_\_\_\_\_.
- If a cake has 8 equal slices and you eat 3, you ate \_\_\_\_\_ of the cake.

## Part C: True or False?

Read each statement. Circle True or False.

- $\frac{3}{4}$  means 3 equal parts out of 4 total parts.  True  False
- The numerator tells how many total parts there are.  True  False
- $\frac{0}{8}$  equals zero because no parts are chosen.  True  False

**Part A: Fix the Sentence**

---

Each sentence has an error. Rewrite it correctly on the line.

1. Fix the sentence: In the fraction  $\frac{2}{5}$ , the number 2 is the denominator.

Rewrite: **In the fraction  $\frac{2}{5}$ , the number 2 is the numerator.**

---

2. Fix the sentence:  $\frac{1}{4}$  is greater than  $\frac{1}{3}$  because 4 is bigger than 3.

Rewrite:  **$\frac{1}{4}$  is less than  $\frac{1}{3}$  because fourths are smaller parts than thirds.**

---

3. Fix the sentence: When a shape is split into 5 equal parts with 5 shaded, half is shaded.

Rewrite: **When a shape is split into 5 equal parts with 5 shaded, the whole shape is shaded.**

---

**Part B: Fill in the Blank**

---

Write the missing word or number on each line.

1. In the fraction  $\frac{6}{10}$ , the denominator is **10** .

2. A rectangle divided into 3 equal parts with 2 shaded shows the fraction  **$\frac{2}{3}$**  .

3. The top number of a fraction is called the **numerator** .

4. If a cake has 8 equal slices and you eat 3, you ate  **$\frac{3}{8}$**  of the cake.

**Part C: True or False?**

---

Read each statement. Circle True or False.

1.  $\frac{3}{4}$  means 3 equal parts out of 4 total parts.  True  False

2. The numerator tells how many total parts there are.  True  False

3.  $\frac{0}{8}$  equals zero because no parts are chosen.  True  False
