

# Spring Math & Reading

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Grade: Grade 4

## Part A: Fix the Sentence

Each sentence has an error. Rewrite it correctly on the line.

1. Fix the sentence:

It rained for 9 days in April. Each day got 4 inches of rain. The total rainfall was 34 inches because  $9 \times 4 = 34$ .

Rewrite: \_\_\_\_\_

2. Fix the sentence:

A rain barrel collected 72 gallons over 6 storms. That is 13 gallons per storm because  $72 \div 6 = 13$ .

Rewrite: \_\_\_\_\_

3. Fix the sentence:

The class planted  $\frac{2}{6}$  of a field on Monday and  $\frac{3}{6}$  on Tuesday. They planted  $\frac{5}{12}$  of the field in all.

Rewrite: \_\_\_\_\_

## Part B: Fill in the Blank

Write the missing word or number on each line.

1. A pond collects 11 gallons of rainwater each hour for 7 hours. It collects \_\_\_\_\_ gallons total.
2. A class shares 117 worms equally among 9 teams for a science project. Each team gets \_\_\_\_\_ worms.
3. A rectangular puddle is 5 ft long and 3 ft wide. Its perimeter is \_\_\_\_\_ feet.
4. A jar holds 32 tadpoles and  $\frac{1}{4}$  of them become frogs. That is \_\_\_\_\_ frogs.

## Part C: Short Answer

Answer each question in one or two complete sentences.

1. A rain gauge measured 8 inches on Monday, 5 inches on Tuesday, and 12 inches on Wednesday. What is the total? What is the average per day? Show your steps.

\_\_\_\_\_

2. The passage says "Puddles dotted the playground, and children splashed in their bright rain boots."

### Part A: Fix the Sentence

Each sentence has an error. Rewrite it correctly on the line.

1. Fix the sentence:

It rained for 9 days in April. Each day got 4 inches of rain. The total rainfall was 34 inches because  $9 \times 4 = 34$ .

Rewrite: **It rained for 9 days in April. Each day got 4 inches of rain. The total rainfall was 36 inches because  $9 \times 4 = 36$ .**

---

2. Fix the sentence:

A rain barrel collected 72 gallons over 6 storms. That is 13 gallons per storm because  $72 \div 6 = 13$ .

Rewrite: **A rain barrel collected 72 gallons over 6 storms. That is 12 gallons per storm because  $72 \div 6 = 12$ .**

---

3. Fix the sentence:

The class planted  $\frac{2}{6}$  of a field on Monday and  $\frac{3}{6}$  on Tuesday. They planted  $\frac{5}{12}$  of the field in all.

Rewrite: **The class planted  $\frac{2}{6}$  of a field on Monday and  $\frac{3}{6}$  on Tuesday. They planted  $\frac{5}{6}$  of the field in all.**

---

### Part B: Fill in the Blank

Write the missing word or number on each line.

1. A pond collects 11 gallons of rainwater each hour for 7 hours. It collects 77 gallons total.
2. A class shares 117 worms equally among 9 teams for a science project. Each team gets 13 worms.
3. A rectangular puddle is 5 ft long and 3 ft wide. Its perimeter is 16 feet.
4. A jar holds 32 tadpoles and  $\frac{1}{4}$  of them become frogs. That is 8 frogs.

### Part C: Short Answer

Answer each question in one or two complete sentences.

1. A rain gauge measured 8 inches on Monday, 5 inches on Tuesday, and 12 inches on Wednesday. What is the total? What is the average per day? Show your steps.

**Step 1: Total rainfall is  $8 + 5 + 12 = 25$  inches. Step 2: Average is  $25 \div 3$  which is about 8 inches per day with 1 inch remaining.**
