Summer Review Sheets

Name: _____ Date: _____ Grade: Grade 4

Part A: Fill in the Blank

Write the missing word or number on each line.

1. A pool party needs 11 pizzas at $9 each. The total cost is $ _____ .
2. An angle that measures exactly 90 degrees is called a _____ angle.
3. A camp divides 192 trail mix bags among 8 groups. Each group receives _____ bags.
4. Two fractions that name the same amount are called _____ fractions.
5. A lifeguard counts 12 rows of 9 chairs by the pool. There are _____ chairs total.
6. A shape with four sides and four right angles is called a _____ .
7. Three families spend $65 each on beach passes. Together they spend $ _____ .
8. A line segment has two _____ that mark where it begins and ends.
9. A water park sells 288 tickets in 6 hours. It sells _____ tickets per hour.

Part B: Matching

Match each item on the left to the correct answer on the right.

1. Match each item to its correct answer.

acute angle	→ _____	measures exactly 90 degrees
obtuse angle	→ _____	measures exactly 180 degrees
right angle	→ _____	measures less than 90 degrees
straight angle	→ _____	measures more than 90 but less than 180 degrees

Part A: Fill in the Blank

Write the missing word or number on each line.

1. A pool party needs 11 pizzas at $9 each. The total cost is $ **99** .
2. An angle that measures exactly 90 degrees is called a **right** angle.
3. A camp divides 192 trail mix bags among 8 groups. Each group receives **24** bags.
4. Two fractions that name the same amount are called **equivalent** fractions.
5. A lifeguard counts 12 rows of 9 chairs by the pool. There are **108** chairs total.
6. A shape with four sides and four right angles is called a **rectangle** .
7. Three families spend $65 each on beach passes. Together they spend $ **195** .
8. A line segment has two **endpoints** that mark where it begins and ends.
9. A water park sells 288 tickets in 6 hours. It sells **48** tickets per hour.

Part B: Matching

Match each item on the left to the correct answer on the right.

1. Match each item to its correct answer.

acute angle	→ **measures less than 90 degrees**	measures exactly 90 degrees
obtuse angle	→ **measures more than 90 but less than 180 degrees**	measures exactly 180 degrees
right angle	→ **measures exactly 90 degrees**	measures less than 90 degrees
straight angle	→ **measures exactly 180 degrees**	measures more than 90 but less than 180 degrees
