

US Regions and States

Name: _____

Date: _____

Grade: Grade 4

Part A: Fix the Sentence

Each sentence has an error. Rewrite it correctly on the line.

1. Fix the sentence: Arizona is located in the Midwest region and has very cold winters.

Rewrite: _____

2. Fix the sentence: The capital of Washington state is Seattle.

Rewrite: _____

3. Fix the sentence: The Northeast region has mild winters with very little snow.

Rewrite: _____

Part B: Fill in the Blank

Write the missing word or number on each line.

- Hurricanes often strike states in the _____ region along the Atlantic coast.
- The _____ region receives the least amount of rainfall in the country.
- Tornadoes are most common in the flat, open areas of the _____ region.
- The state of _____ gets more rain than any other state in the West region.

Part C: Short Answer

Answer each question in one or two complete sentences.

1. Why do deserts form in the Southwest region?

2. How does the climate of the Northeast change across the four seasons?

Part A: Fix the Sentence

Each sentence has an error. Rewrite it correctly on the line.

1. Fix the sentence: Arizona is located in the Midwest region and has very cold winters.

Rewrite: Arizona is located in the Southwest region and has very hot, dry summers.

2. Fix the sentence: The capital of Washington state is Seattle.

Rewrite: The capital of Washington state is Olympia.

3. Fix the sentence: The Northeast region has mild winters with very little snow.

Rewrite: The Northeast region has cold winters with heavy snowfall.

Part B: Fill in the Blank

Write the missing word or number on each line.

1. Hurricanes often strike states in the Southeast region along the Atlantic coast.
2. The Southwest region receives the least amount of rainfall in the country.
3. Tornadoes are most common in the flat, open areas of the Midwest region.
4. The state of Washington gets more rain than any other state in the West region.

Part C: Short Answer

Answer each question in one or two complete sentences.

1. Why do deserts form in the Southwest region?

Deserts form in the Southwest because the area receives very little rain. Mountains block moisture from the ocean, so the land stays hot and dry.

2. How does the climate of the Northeast change across the four seasons?

The Northeast has warm summers and very cold winters with snow. Spring and fall are mild with changing leaves in autumn.
