

# Argumentative Writing

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Grade: Grade 5

## Part A: Multiple Choice

Circle the best answer for each question.

1. A candy company publishes a study saying sugar improves memory. Why should a reader question this source?

- A) The study was published too recently to be accurate.
- B) The company profits from selling sugar, so the study may be biased.
- C) Memory studies are always unreliable.
- D) Only doctors can publish studies about food.

2. Which source is MOST credible for an argument about the benefits of exercise?

- A) A post from a fitness influencer with no medical training.
- B) A comment from a classmate who runs every day.
- C) A report from the Centers for Disease Control and Prevention.
- D) An advertisement from a sneaker company.

3. Read: 'According to a 2023 national survey of 10,000 teachers, 82% support daily physical education.' What makes this evidence strong?

- A) It mentions the year, which means it is automatically correct.
- B) It surveys teachers, who always agree with each other.
- C) It includes a large sample size, a specific percentage, and identifies the survey.
- D) It uses a round number that is easy to remember.

4. A student only reads articles that agree with their claim and ignores opposing research. This is an example of:

- A) Strong research skills.
- B) Confirmation bias — only seeking information that supports your view.
- C) Using primary sources correctly.
- D) Effective counterargument strategy.

## Part B: Fill in the Blank

Write the correct answer on each line.

1. A source is \_\_\_\_\_ when it has a reason to present information in a one-sided way.
2. A \_\_\_\_\_ source provides accurate, well-researched information that can be trusted.
3. Government agencies and universities are generally considered more \_\_\_\_\_ than personal blogs.
4. Before using a source, a writer should check who wrote it, when it was published, and whether the

**Part A: Multiple Choice**

Circle the best answer for each question.
