

Halloween Math & Reading

Name: _____

Date: _____

Grade: Grade 5

Part A: Fix the Sentence

Each sentence has an error. Rewrite it correctly on the line.

1. Fix the sentence: The witches broom flew threw the midnight sky scattering sparks behind it.

Rewrite: _____

2. Fix the sentence: Neither the skeleton nor the mummy were invited to the monster's ball.

Rewrite: _____

3. Fix the sentence: The children collected they're candy in orange buckets then sorted it by type.

Rewrite: _____

Part B: Fill in the Blank

Write the missing word or number on each line.

1. A fraction where the numerator is larger than the denominator, like $\frac{7}{4}$, is called an _____ fraction.
2. The result of multiplying two numbers together is called the _____.
3. In the number 5.038, the digit 3 is in the _____ place.
4. To simplify a fraction, divide the numerator and denominator by their greatest common _____.

Part C: Short Answer

Answer each question in one or two complete sentences.

1. A skeleton needs $\frac{3}{8}$ of a yard of fabric for each bone cover. If it has 16 bones to cover, how many yards of fabric are needed?

2. A cauldron holds 5.5 liters. A witch fills it with 3 batches of 1.75 liters each. Is the cauldron full? Explain.

Part A: Fix the Sentence

Each sentence has an error. Rewrite it correctly on the line.

1. Fix the sentence: The witches broom flew threw the midnight sky scattering sparks behind it.

Rewrite: The witch's broom flew through the midnight sky, scattering sparks behind it.

2. Fix the sentence: Neither the skeleton nor the mummy were invited to the monster's ball.

Rewrite: Neither the skeleton nor the mummy was invited to the monster's ball.

3. Fix the sentence: The children collected they're candy in orange buckets then sorted it by type.

Rewrite: The children collected their candy in orange buckets, then sorted it by type.

Part B: Fill in the Blank

Write the missing word or number on each line.

1. A fraction where the numerator is larger than the denominator, like $\frac{7}{4}$, is called an improper fraction.
2. The result of multiplying two numbers together is called the product.
3. In the number 5.038, the digit 3 is in the hundredths place.
4. To simplify a fraction, divide the numerator and denominator by their greatest common factor.

Part C: Short Answer

Answer each question in one or two complete sentences.

1. A skeleton needs $\frac{3}{8}$ of a yard of fabric for each bone cover. If it has 16 bones to cover, how many yards of fabric are needed?

Multiply $16 \times \frac{3}{8} = \frac{48}{8} = 6$. The skeleton needs 6 yards of fabric.

2. A cauldron holds 5.5 liters. A witch fills it with 3 batches of 1.75 liters each. Is the cauldron full? Explain.

Multiply $3 \times 1.75 = 5.25$ liters. Since 5.25 is less than 5.5, the cauldron is not full. It still has 0.25 liters of space.
