### Part C: Short Answer

---

Answer each question in one or two complete sentences.

1. Maya has \$50.00. She buys a hat for \$12.50 and gloves for \$8.75. How much money does she have left? Show your reasoning.

*Add the two purchases:  $\$12.50 + \$8.75 = \$21.25$ . Subtract from \$50.00:  $\$50.00 - \$21.25 = \$28.75$ .  
Maya has \$28.75 left.*

---

2. A store sells wrapping paper for \$3.50 per roll. Explain how you would find the cost of 4 rolls and the change from \$20.00.

*Multiply  $4 \times \$3.50 = \$14.00$ . Then subtract from \$20.00:  $\$20.00 - \$14.00 = \$6.00$  in change.*
