

# Winter Holiday Math & Reading

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Grade: Grade 5

## Part A: Fix the Sentence

Each sentence has an error. Rewrite it correctly on the line.

1. Fix the sentence:

A cookie recipe needs  $\frac{1}{2}$  cup of butter and  $\frac{1}{2}$  cup of sugar, so you need  $\frac{2}{4}$  cup of ingredients.

Rewrite: \_\_\_\_\_

2. Fix the sentence:

There are 8 cups in a gallon, so a half gallon holds 4 cups.

Rewrite: \_\_\_\_\_

3. Fix the sentence:

If you triple a recipe that calls for  $\frac{2}{3}$  cup of flour, you need  $\frac{6}{9}$  cup of flour.

Rewrite: \_\_\_\_\_

## Part B: Fill in the Blank

Write the missing word or number on each line.

1. A gingerbread recipe makes 36 cookies. If you cut it in half, you make \_\_\_\_\_ cookies.

2. One tablespoon equals 3 teaspoons. So 4 tablespoons equals \_\_\_\_\_ teaspoons.

3. A batch of fudge takes 45 minutes to cool. Three batches cooling one after another take \_\_\_\_\_ minutes total.

4. Flour, sugar, and eggs are common baking \_\_\_\_\_.

## Part C: Short Answer

Answer each question in one or two complete sentences.

1. A holiday cookie recipe calls for  $\frac{3}{4}$  cup of brown sugar and  $\frac{1}{4}$  cup of white sugar. How much total sugar is needed? If you double the recipe, how much sugar do you need?

\_\_\_\_\_

\_\_\_\_\_

2. A bakery sells holiday cupcakes in boxes of 6. If the bakery made 84 cupcakes, how many full boxes can they fill? Explain your reasoning.

**Part A: Fix the Sentence**

---

Each sentence has an error. Rewrite it correctly on the line.

1. Fix the sentence:

A cookie recipe needs  $\frac{1}{2}$  cup of butter and  $\frac{1}{2}$  cup of sugar, so you need  $\frac{2}{4}$  cup of ingredients.

Rewrite: A cookie recipe needs  $\frac{1}{2}$  cup of butter and  $\frac{1}{2}$  cup of sugar, so you need 1 cup of ingredients.

---

2. Fix the sentence: There are 8 cups in a gallon, so a half gallon holds 4 cups.

Rewrite: There are 16 cups in a gallon, so a half gallon holds 8 cups.

---

3. Fix the sentence: If you triple a recipe that calls for  $\frac{2}{3}$  cup of flour, you need  $\frac{6}{9}$  cup of flour.

Rewrite: If you triple a recipe that calls for  $\frac{2}{3}$  cup of flour, you need 2 cups of flour.

---

**Part B: Fill in the Blank**

---

Write the missing word or number on each line.

1. A gingerbread recipe makes 36 cookies. If you cut it in half, you make 18 cookies.
2. One tablespoon equals 3 teaspoons. So 4 tablespoons equals 12 teaspoons.
3. A batch of fudge takes 45 minutes to cool. Three batches cooling one after another take 135 minutes total.
4. Flour, sugar, and eggs are common baking ingredients.

**Part C: Short Answer**

---

Answer each question in one or two complete sentences.

1. A holiday cookie recipe calls for  $\frac{3}{4}$  cup of brown sugar and  $\frac{1}{4}$  cup of white sugar. How much total sugar is needed? If you double the recipe, how much sugar do you need?

$\frac{3}{4} + \frac{1}{4} = \frac{4}{4} = 1$  cup total. Doubling the recipe means  $2 \times 1 = 2$  cups of sugar.

---

---

2. A bakery sells holiday cupcakes in boxes of 6. If the bakery made 84 cupcakes, how many full boxes can they fill? Explain your reasoning.
